

COLORADO CANCER COALITION

2017 REVIEW

In 2016, the Colorado Cancer Coalition restructured its organization and worked with the Colorado Department of Public Health and Environment to launch the Colorado 2016-2020 Cancer Plan. We emerged as a stronger coalition with a renewed relationship with our state health department and the Trailhead Institute for Public Health Innovation.

The Colorado Cancer Coalition is a statewide collaborative working to eliminate the burden of cancer in Colorado. We engage, facilitate, expand and strengthen the state-wide network dedicated to improving Colorado lives touched by cancer.

STATEWIDE COLLABORATION

After the reorganization and with the guidance of the state's new 2016-2020 Colorado Cancer Plan, the Coalition developed 10 task forces to create action plans and begin work across the state. One of those task forces developed into a new Screening Coordination Committee. Members statewide can participate in these task forces in person or remotely through phone or Zoom meeting software.

In April 2017, the Coalition hosted its quarterly meeting in collaboration with the Colorado Colorectal Screening Program and the National Colorectal Cancer Roundtable. Mary Doroshenk from the National Colorectal Cancer Roundtable presented on the national *80% By 2018* initiative and local experts spoke about Colorado's progress toward meeting the goal of the initiative.

THE COLORADO CANCER FUND

Every tax season, Coloradans have the opportunity to contribute a portion of their tax refund to a non profit in Colorado through the state check off fund.

The Colorado Cancer Fund, a program of the Colorado Cancer Coalition, is a

beneficiary of this program and seeks to reduce mortality from cancer by improving early detection and expanding existing education, screening and quality of life services throughout Colorado for populations who are currently underserved. In 2017, we raised over \$65,000 through the Colorado Cancer Fund!

BUDDY CHECK9 COLLABORATION

Each month, the Coalition helps 9News with Buddy Check9, including experts to answer phone lines and information on screening, symptoms, treatment, events and support groups.

In March 2017, the Coalition provided three colorectal experts to help answer 9News viewers' questions about colorectal cancer for Colorectal Cancer Awareness Month.

In April 2017, the Coalition provided information for Oral, Head, Neck and Thyroid Cancer Awareness.

In May 2017, the Skin Cancer Task Force shared the REVEAL camera to promote sun safety, provided information for an article and social media post, and provided three skin cancer experts to answer viewer questions during Skin Cancer Awareness Month.

TASK FORCE UPDATES

Our coalition task forces were busy this year. Read below for highlights.

BREAST CANCER TASK FORCE

The mission of the Breast Cancer Task Force is to advocate for and improve quality care from screening through survivorship for people affected by breast cancer in Colorado.

Members of the Breast Cancer Task Force facilitated numerous outreach events throughout the state during the past year, including distributing educational materials and spreading awareness about breast cancer prevention, screening options, clinical guidelines, risk factors and links to resources. We reached more than 90,000 Coloradans through magazine ads for Breast Cancer Awareness Month in October 2016 (70,000 readers) and event attendance.

COLORECTAL CANCER TASK FORCE

The mission of the Colorectal Cancer Task Force is to prevent colorectal cancer through screening and decrease the incidence and mortality from colorectal cancer in Colorado.

Stephen, a cancer survivor, shares his story.

Each year during Colorectal Cancer Awareness Month in March, the task force promotes activities and awareness events across Colorado to encourage people to learn more about this preventable, treatable and beatable cancer. This year, task force members created content for distribution online, in person and through the media.

In 2017, Gov. John Hickenlooper declared March Colorectal Cancer Awareness Month. During that month, a colon cancer survivor shared his story on Jammin' 101.5 radio and Telemundo created and aired television spots throughout the month. Colorectal cancer experts were available to answer calls and questions from the community on 9News as part of the Buddy Check9 program.

Candlelight vigil on Dress in Blue Eve.

Additionally, the Task Force held a candlelight vigil on the steps of the Denver City and County Building on Dress in Blue Eve to honor all those touched by colorectal cancer. Task force members also held lunch and learns with local experts and providers in northeastern Colorado, southeastern Colorado, and the Denver metro area.

FAMILY HISTORY TASK FORCE

The mission of the Family History Task Force is to increase and improve the use of family history to improve cancer outcomes.

The task force has been working closely with the Public Health Cancer Genomics Program funded by the Centers for Disease Control and Prevention and housed at the Colorado Department of Public Health and Environment. With input from task force members, the program developed a website to educate providers and the public about hereditary cancers,

resources for assessing personal risk and accessing genetic counseling. The website will be linked to the Colorado Cancer Coalition's website for easier access by coalition members and those looking for information related to family history and cancer genetics.

SKIN CANCER TASK FORCE

The mission of the Skin Cancer Task Force is to decrease skin cancer rates by increasing awareness about sun safety and skin cancer prevention through community outreach and educational events.

Members of the task force participated in approximately 20 events statewide throughout the year to provide education and awareness of the dangers of skin damage and risk of skin cancer from ultraviolet rays. Events included community events, employee conferences, school events and fundraisers. Close to 1,000 individuals had their picture taken with the REVEAL cross polarized light camera to see where signs of skin damage were evident on their face and to learn about effective methods to prevent further damage.

REVEAL camera image showing signs of skin damage.

HPV VACCINATION TASK FORCE

The mission of the HPV Vaccination Task Force is to improve HPV vaccination rates and lower the burden of HPV-associated disease and cancer through collaboration with public health professionals, clinicians, academics, community members and others.

The task force identified areas of overlap, gaps and opportunities to improve HPV vaccination. The task force received a grant to support infrastructure and capacity development, strengthen relationships with community partners and extend their reach. Members of the task force attended nine community events, distributed HPV materials and information to

more than 20 local public health agencies and five school nurses statewide, and recruited 15 task force members with the help of the grant funding.

LUNG CANCER TASK FORCE

The mission of the Lung Cancer Task Force is to decrease the lung cancer burden in Colorado by increasing awareness of lung cancer as the leading cause of cancer death in Colorado, encouraging prevention of lung cancer through smoking cessation and radon mitigation, promoting lung cancer screening and improving access to care.

A task force retreat in February 2015 led to an effort to increase the tobacco tax in Colorado, a proven method for decreasing consumption. Task force co-chairs and members representing the American Heart Association, American Lung Association, health care providers, health care systems and patients collaborated with more than 50 organizations to launch the Campaign for a Healthier Colorado to pass Amendment 72, increasing the tobacco tax by \$1.75. The amendment failed, but members built strong relationships and are considering another ballot initiative for 2018.

PATIENT NAVIGATION TASK FORCE

The mission of the Patient Navigation Task Force is to increase availability of Patient Navigation and Community Health Worker services across the cancer continuum of care in Colorado.

The task force has become an affinity group of the Colorado Patient Navigator, Community Health Worker & Promotor de Salud Alliance. The alliance promotes policies, programs and partnerships that reduce and eliminate barriers to quality health care, reduce disparities in health outcomes and foster ongoing health equity.

OVARIAN CANCER TASK FORCE

The mission of the Ovarian Cancer Task Force is to decrease the incidence and mortality of ovarian cancer in Colorado by encouraging genetic counseling, educating medical professionals and collaborating with other task forces to expand knowledge of the unique needs of women with persistent and recurrent ovarian cancer.

Studies show that gynecologic cancer patients treated by a gynecologic oncologist have better outcomes and longer life expectancy. The Ovarian Cancer Task Force is working with COPIC to add a question to the COPIC malpractice insurance application for general surgeons and gynecologists to find out if they engage in gynecological oncology surgeries, which would increase the risk for COPIC.

SURVIVORSHIP TASK FORCE

The mission of the Survivorship Task Force is to address the needs of cancer patients, caregivers and providers who are involved in cancer care from the time of diagnosis through the end of life.

Cooking demonstration with Project Angel Heart.

The task force held its first Cancer Survivors' Day May 13, 2017, in the Denver metro area. The event brought 65 patients and caregivers together for a fun and interactive day of learning and sharing with others going through similar cancer journeys. It included a guided walk, cooking demonstration, laughter yoga, informative speakers and more. Attendees learned about cancer support resources from more than 20 community organizations with exhibit booths. Those who attended called it a success and appreciated the "camaraderie," "friendly vendors," "the emotional and spiritual support from other caregivers" and the "opportunity to laugh."

SCREENING COORDINATION COMMITTEE

The Screening Coordination Committee is a collaborative group focusing on the coordination of cancer screening efforts by synergizing the work of other Colorado Cancer Coalition task forces, aligning broader efforts to improve cancer screening rates and building knowledge and awareness, guided by the Colorado Cancer Plan.

In February and March 2017, committee members presented 'Fit' Your Business for Cancer Screening: Help Make Colorado a Leader in Cancer Prevention to the Colorado Business Group on Health and the Cancer Caucus of the Colorado General Assembly. In total, more than 50 employers, insurers, legislators and other stakeholders attended. The presentation focused on cancer trends in Colorado, the importance of cancer screening and the business case for employers to care about cancer by encouraging businesses to build cancer-friendly workplaces to increase employee wellness and productivity.

CANCER, CARDIOVASCULAR AND CHRONIC PULMONARY DISEASE GRANTS PROGRAM ALIGNMENT

The Colorado Cancer Plan's objectives align with strategies of two Colorado Department of Public Health and Environment grant programs funded by state tobacco tax revenues. These two programs awarded approximately \$32 million to projects that implement the Colorado Cancer Plan. The Tobacco Education, Prevention and Cessation Grant Program (\$22-25M/year) is dedicated to decreasing tobacco use, initiation and exposure and increasing cessation. The Cancer, Cardiovascular Disease and Chronic Pulmonary Disease (CCPD) Competitive Grants Program (\$10 million) includes strategies that align with priorities within the Colorado Cancer Plan, including healthy eating and active living projects. CCPD funded projects include:

Boulder County Public Health (Lung Cancer/Radon Exposure):
The Public Health Regional Radon Roadmap

Denver Public Health (HPV Vaccination): Denver Metro
Alliance for HPV Prevention

Larimer County Department of Health and Environment (HPV Vaccination): Community-based Cancer Interventions for HPV Vaccination in Larimer County

Metro Community Provider Network (Cancer Family History):
MCPN CCPD Colorado Generations

Otero Junior College (Patient Navigation): Community Health Worker and Navigation Education: Wraparound Success

Peak Vista Community Health Centers (HPV Vaccination):
Peak Vista Prevents HPV

Summit Community Care Clinic (Colorectal and Lung Cancer, and HPV Vaccination): CCPD Grant Program for Summit Care Clinic

University of Colorado Cancer Center (Survivorship): Building Capacity in Quality Cancer Survivorship Care

University of Colorado Denver (Colorectal Cancer):
Increasing Colorectal Cancer Screening in Colorado Using a Comprehensive Approach

University of Colorado Denver (Survivorship): Quality Care for Adult Survivors of Childhood Cancer in Colorado: Thriving After Childhood Cancer is Complete (TACTIC)

University of Colorado Denver (Skin Cancer):
Multi-Component, Campus-Wide Program to Reduce Environmental, Policy, and Behavioral Risks for Skin Cancer at College and Universities in Colorado

DATA UPDATES

Progress on 2016-2020 Colorado Cancer Plan goals, objectives and measures.

GOAL 1: REDUCED INITIATION AND USE OF TOBACCO PRODUCTS

OBJECTIVES

1.1 Decrease tobacco use.

MEASURES

Current adult smokers.

2016 UPDATE

2020 TARGET

15.6%

12%

Baseline: **15.7%** (2014 BRFSS)

1.3 Increase successful quit attempts among tobacco users.

Adults smokers who attempted cessation in the past 12 months.

2016 UPDATE

2020 TARGET

67.8%

75%

Baseline: **63%** (2014 BRFSS)

GOAL 2: INCREASED PREVALENCE OF HEALTHY BEHAVIORS

OBJECTIVES

2.1 Decrease the prevalence of overweight and obesity.

MEASURES

Children ages 5-14 years* who are overweight or obese.

2016 UPDATE

2020 TARGET

22.3%

18.36%

Baseline: **20.4%** (2013 CCHS)

Note: We now only calculate BMI for children ages 5-14, rather than 2-14 as noted in the Colorado Cancer Plan. Baseline and Target are updated.

Adults ages 18+ who are overweight or obese.

2016 UPDATE

2020 TARGET

58.1%

50.8%

Baseline: **57.4%** (2014 BRFSS)

Adults ages 18+ who are obese.

2016 UPDATE

2020 TARGET

22.3%

20%

Baseline: **21.3%** (2014 BRFSS)

Adults who report no leisure time physical activity in the past 30 days.

2015 UPDATE

2020 TARGET

15.8%

14.8%

Baseline: **16.4%** (2014 BRFSS)

GOAL 2: INCREASED PREVALENCE OF HEALTHY BEHAVIORS, CONT.

OBJECTIVES

2.1 Decrease the prevalence of overweight and obesity, cont.

2.2 Decrease the proportion of adults exceeding dietary guidelines for moderate drinking.

2.3 Decrease exposure to ultraviolet (UV) radiation.

MEASURES

Adults who report eating at least one fruit and one vegetable per day. Baseline: 57.1% (2013 BRFSS)	2015 UPDATE 56.4%	2020 TARGET 65.7%
Women ages 21+ who exceed dietary guidelines for moderate drinking. Baseline: 39.6% (2014 BRFSS)	2016 UPDATE 42%	2020 TARGET 35%
Men ages 21+ who exceed dietary guidelines for moderate drinking. Baseline: 43.4% (2014 BRFSS)	2016 UPDATE 45.6%	2020 TARGET 40%
Men ages 18+ who binge drank in the past 30 days. Baseline: 22.8% (2014 BRFSS)	2016 UPDATE 24.2%	2020 TARGET 20%
Women ages 18+ who binge drank in the past 30 days. Baseline: 12.2% (2014 BRFSS)	2016 UPDATE 13.9%	2020 TARGET 11%
Children (1-14)* who use at least one method of sun protection when outside for more than 15 minutes between 11 a.m. and 3 p.m. Baseline: 78.8% (2012 CCHS) <i>Note: This measure now only includes children 1-14, not 0-14 as noted in the 2016-2020 Colorado Cancer Plan. Original baseline was incorrect. This is the updated baseline.</i>	2015 UPDATE 72.5%	2020 TARGET 82%
Adults with at least one sunburn in the past year. Baseline: 37.5% (2014 BRFSS) <i>Note: The way this question was asked has changed since 2014.</i>	2016 UPDATE 20.2%	2020 TARGET 33%
Children (1-14)* with at least one sunburn in the past year. Baseline: 45.6% (2012 CCHS) <i>Note: This measure now only includes children 1-14, not 0-14 as noted in the 2016-2020 Colorado Cancer Plan. Original baseline was incorrect. This is the updated baseline.</i>	2015 UPDATE 42.1%	2020 TARGET 40%

GOAL 3: INCREASED UPTAKE OF CLINICAL INTERVENTIONS TO PREVENT CANCER

OBJECTIVES

3.1 Increase collection and use of family history of cancer to ensure appropriate and risk-based cancer prevention messaging, screening and referrals.

3.2 Increase HPV and Hepatitis B vaccine uptake.

MEASURES

Adults who discussed their family's history of cancer with a health care provider.

Baseline: **59.8%** (2016 BRFSS)

2016 UPDATE

59.8%

2020 TARGET

62.8%

Adults ages 18-26 who have received an HPV vaccine.

Baseline: **36.5%** (2014 BRFSS)

2015 UPDATE

39.3%

2020 TARGET

80%

Adults ages 18-26 who have received three doses of the HPV vaccine.

Baseline: **19.9%** (2014 BRFSS)

2015 UPDATE

23.1%

2020 TARGET

80%

GOAL 4: DECREASED ENVIRONMENTAL EXPOSURES THAT LEAD TO CANCER

OBJECTIVES

4.1 Increase knowledge and community infrastructure to decrease exposure to radon.

4.2 Increase testing of household drinking water wells.

4.3 Decrease exposure to asbestos and diesel exhaust.

MEASURES

Adults who test their homes for radon.

Baseline: **42%** (2012 BRFSS)

2016 UPDATE

45.9%

2020 TARGET

50%

Households with drinking water wells that were tested in the past 5 years.

Baseline: **37%** (2011 BRFSS)

2016 UPDATE

55.4%

2020 TARGET

47%

Gallons of displaced gasoline fuel due to alternative fuel use of compressed natural gas (CNG) and biodiesel.

Baseline: **4,973,234** (2014 Clean Cities Coalition)

Original baseline was incorrect. This is updated baseline.

2015 UPDATE

5,238,287

2020 TARGET

5,201,581

GOAL 5: INCREASED HIGH-QUALITY CANCER SCREENING AND EARLY DETECTION RATES

OBJECTIVES

5.1 Increase high-quality, guideline-adherent, cancer screening rates among average risk individuals.

5.2 Increase high-quality, guideline-adherent, cancer screening rates among targeted populations.

MEASURES

<p>Women ages 50+ who had a mammogram within the last two years.</p> <p>Baseline: 72.4% (2014 BRFSS)</p>	<p>2016 UPDATE</p> <p>71.7%</p>	<p>2020 TARGET</p> <p>81.1%</p>
<p>Women ages 40-49 who had a mammogram within the last two years.</p> <p>Baseline: 57.6% (2014 BRFSS)</p>	<p>2016 UPDATE</p> <p>58.6%</p>	<p>2020 TARGET</p> <p>63.4%</p>
<p>Women ages 21-65 who had a Pap test within the last 3 years.</p> <p>Baseline: 84.9% (2014 BRFSS)</p>	<p>2016 UPDATE</p> <p>80.7%</p>	<p>2020 TARGET</p> <p>93%</p>
<p>Men and women ages 50-75 who are adherent with colorectal cancer screening guidelines (FOBT in 1 year, flexible sigmoidoscopy in 5 years + FOBT in 3 years, or colonoscopy in 10 years).</p> <p>Baseline: 66.7% (2014 BRFSS)</p>	<p>2016 UPDATE</p> <p>67.7%</p>	<p>2020 TARGET</p> <p>80%</p>
<p>Men ages 40+ who have had a discussion with their provider on the advantages and disadvantages of a PSA test.</p> <p>Baseline: 27.4% (2014 BRFSS)</p>	<p>2016 UPDATE</p> <p>26%</p>	<p>2020 TARGET</p> <p>31.5%</p>

5.3 Increase early detection rates of non-screenable cancers

GOAL 6: CONSISTENT ACCESS TO, AND APPLICATION OF, QUALITY DIAGNOSTIC AND TREATMENT SERVICES ADHERENT WITH NATIONALLY RECOGNIZED STANDARDS

OBJECTIVES

6.4 Increase testing among individuals whose cancer treatment may benefit from targeted proven or emerging therapies.

MEASURES

Colorectal cancer cases among those 70 years and younger with microinstability (MSI) or mismatch repair (MMR) protein expression testing. Baseline: 56.4% (2017 CCCR)	2017 UPDATE 56.4%	2020 TARGET TBD*
Metastatic colorectal cancer cases tested for KRAS mutations. Baseline: 20% (2017 CCCR)	2017 UPDATE 20%	2020 TARGET TBD*
Breast cancer cases with complete testing (ER/PR/Her2) to identify triple negative tumors. Baseline: 77.8% (2017 CCCR)	2017 UPDATE 77.8%	2020 TARGET TBD*

*2016 was used for baseline determination. The CCC will determine targets by 2018.

GOAL 8: IMPROVED PHYSICAL, MENTAL AND SOCIAL WELL-BEING AMONG CANCER SURVIVORS

OBJECTIVES

8.1 Improve physical health among cancer survivors.

MEASURES

Cancer survivors ages 18+ who are current smokers. Baseline: 12.4% (2014 BRFSS)	2016 UPDATE 12.6%	2020 TARGET 9.3%
Cancer survivors ages 18+ who report no leisure time physical activity in the past 30 days. Baseline: 21.1% (2014 BRFSS)	2016 UPDATE 23.1%	2020 TARGET 19.9%
Cancer survivors ages 18+ who report poor physical health on 14 or more of the past 30 days. Baseline: 20.6% (2014 BRFSS)	2016 UPDATE 24.4%	2020 TARGET 15%
Cancer survivors ages 18+ who report eating at least one fruit and one vegetable per day. Baseline: 62.9% (2013 BRFSS)	2015 UPDATE 60.7%	2020 TARGET 65.7%
Cancer survivors ages 18+ who are obese or overweight. Baseline: 60% (2014 BRFSS)	2016 UPDATE 61.4%	2020 TARGET 50.8%
Cancer survivors who report poor mental health on 14 or more of the past 30 days. Baseline: 13.1% (2014 BRFSS)	2016 UPDATE 14.7%	2020 TARGET 11.1%

8.2 Improve mental health among cancer survivors

WAYS TO GET INVOLVED

Everyone has a role to play in preventing and controlling cancer, and in supporting Colorado's cancer survivors.

Together we can make a difference.

PRIMARY CARE EXPERTISE

Do you work in a primary care office? We need you and your expertise. We often have ideas and initiatives that focus on working with primary care offices and reaching their patients. Consider joining our steering committee or the screening coordination committee to provide your feedback as it relates to reaching patients at primary care offices.

SURVIVOR AND CAREGIVER INPUT NEEDED

Are you a cancer survivor or caregiver? We need you and your guidance. As the Colorado Cancer Coalition develops new programs and initiatives for survivors and caregivers, your input is invaluable. Consider joining a task force or our Survivor and Caregiver Advisory Board. Most requests can be completed via email or phone.

If you are interested in our Survivor and Caregiver Advisory Board, please fill out this brief form at the link below:
www.coloradocancercoalition.org/survivorcaregiver-advisory-board/

COLORADO CANCER COALITION ANNUAL SYMPOSIUM

..... **OCTOBER 18**

PARTNERSHIPS

Not on our list? Want to get involved? Consider joining a task force or attending the next quarterly meeting to see what the Colorado Cancer Coalition is all about.

SPEAKERS BUREAU

Need a local cancer expert for your next event or support group meeting? Check out the CCC Speaker's Bureau. Do you have expertise in a particular cancer topic? Become a Speaker to share your expertise with the Coalition and our partners.
